HB "Mini" Level Transmitter

FEATURES:

- Specifically designed for balance tank, CIP vessel, and other sanitary level control applications
- Rugged reliability in the harshest applications and environments
- Compact, ultra-sanitary package meets or exceeds requirements for Food, Beverage, Dairy and Bio-Pharmaceutical applications
- Fast shipment -(4 day standard)

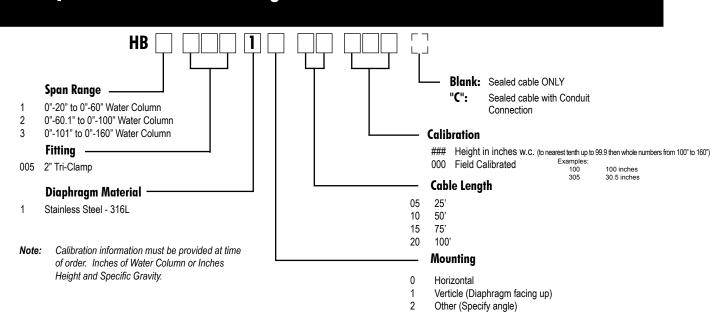

The "HB" has been specifically designed for use in simple level control applications such as *balance tanks* and *CIP vessels*. We understand the harsh environment typically encountered in such applications and have designed this product to stand up to direct wash-downs and wide variations in temperature. The sensor is available in three ranges for tanks 20" to 60" ("low range"), 60.1" to 100" ("mid range") and 101" to160" ("high range"). Connections includes a 2" Tri-Clamp[®] and all sensors are supplied with up to 100' of sealed, shielded cable (25' is standard). Internal compensation allows the transmitter to perform at temperatures up to 200° F (93° C) and withstand cleaning and sterilization to 250° F (121° C).
