Sanitary Door Openers

To avoid germs and viruses, we have the most complete solutions for opening doors **WITHOUT** touching them with your hands. These products are widely used in labs, plants, restrooms, and other places where hygiene is important.

Our touchless, hygienic door handles are simple, effective solutions to preventing contamination from virus or germs that can be found on doorknobs. Pull with your foot, pull with your arm, or pull with your elbow. Any way you open the door, your clean hands never touch that handle.

FootPull

The FootPull Door Opener allows you to open the door using your foot, so you don't have to touch that dirty door handle.

- Easy to install and use, this device is a simple answer to an old problem. The FootPull comes with a pad on the inside so that it will not scratch shoes.
- Heavy-duty, one-piece 356 aluminum, silver, textured finish.

Construction

- Permanent cast solid one piece 356 aluminum.
- Powder coat finish.

Installation

- Mount to base of door 3.5" from the floor using the mounting screws for wood door. Drill holes and set anchors for hollow metal doors.

FootPull Kit Contents

- FootPull device with mounting holes.
- Door sticker identifying the FootPull.
- Mounting instructions.
- All necessary hardware for wood or metal doors.
