

A HISTORY OF EXCELLENCE

Since 1985, Enerquip has been designing and fabricating custom shell and tube heat exchangers for top suppliers in sanitary and industrial markets.

Our reputation for high quality and competitive lead-times have earned the trust of many top companies in a variety of industries including dairy, food and beverage, pharmaceutical, chemical, energy, and more.

OUR SPECIALTIES

- Sizes: Up to 48" diameter (or larger depending on weight)
- Styles: U-Tube, straight tube, single-pass or multi-pass configurations
- Materials: Carbon steel, 304L SS, 316L SS, Duplex, AL6XN, Hastelloy, and more (sanitary SS equipment is manufactured in our carbon-free facility in Medford, WI)
- Types: ASME, TEMA (Class B, C or R), PED, CRN

OUR SOLUTIONS

- | | |
|--------------------------|-------------------------------|
| • WFI & CIP Heaters | • Evaporators |
| • Point-of-use Coolers | • Utility Heaters and Coolers |
| • Preheaters | • Reboilers |
| • Process Coolers | • Stock and Custom Exchangers |
| • Condensers | |
| • Clean Steam Generators | |

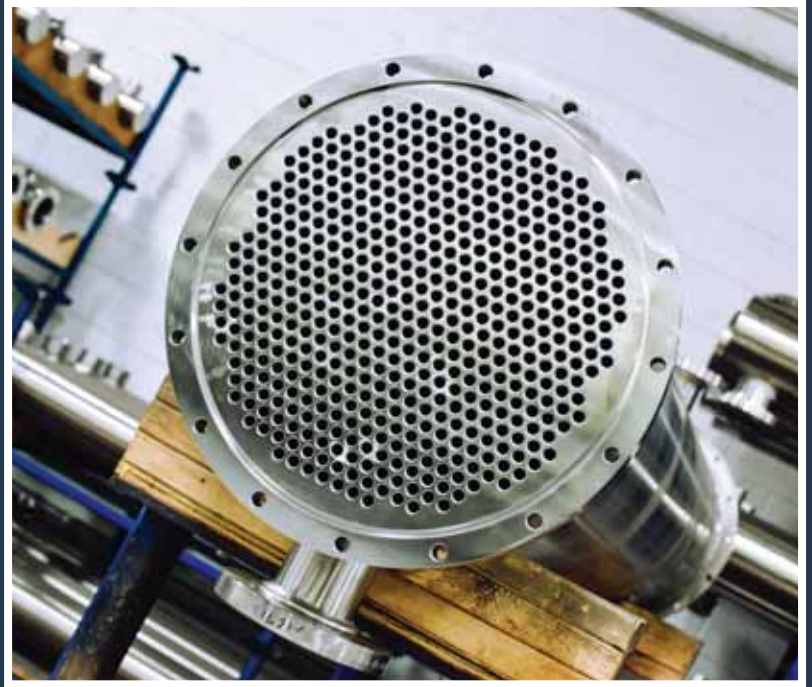

QUALITY STANDARDS

Enerquip has an outstanding reputation for delivering high quality equipment.

Our quality control program encompasses every aspect of our operation from mechanical design, fabrication, testing, and preparation for shipment.

Enerquip builds equipment in accordance with ASME Code and the TEMA Standard, and can build to meet 3-A, PED, API 660 and Canadian Registration (CRN) requirements (when applicable).

We will also build to customer specifications to ensure our exchangers will meet or exceed your needs.

DELIVERY SCHEDULES

Enerquip streamlines the design and fabrication process by drawing on past experience and a library of thousands of successful designs as a starting point.

By adding custom features during the design process, we can quickly develop approval drawings for your equipment that meet your needs.

Our in-house machining capabilities and certified welders allow us to maintain tight control over the schedule of the fabrication process, avoiding the delays normally associated with outsourcing.

For you, this results in on-time or early delivery.

Want more? Enerquip also designs and builds bayonet heaters, condensers, and more. Learn for yourself why Enerquip's quality and service is unmatched in the industry. Call us, today!
